SOLUTIONZ

St. John Baptist

The Problem: The church needed a way to improve member engagement and an easier way to collect offering. They also wanted a new way to connect millennial to sermons.

The Solution: Created an app that allows the members to easily give their tithes and offerings. St. John can also send push notifications to everyone who has the app downloaded to inform members of upcoming events and services. The app includes church history, information about the Pastor, online giving, worship schedule, contact information, calendar of events, a prayer wall, verse of the day, a podcast, sermons, and a built in media player. This has increased engagement and offerings.

The Value: Member giving has increased, sermon plays have increased, and millennial engagement is at an all time high.
